Gregory Fyfe

FIELD OPERATIONS & PROJECT COORDINATION

(732) 754-3478 · fyfegreg@gmail.com · linkedin.com/in/gregory-fyfe · gregfyfeportfolio.com

PROFILE

Field operations professional with an associate degree in HVAC-R, hands-on service experience with Johnson Controls and Edison Heating & Cooling, and current on-site supervision for a commercial mechanical contractor. Combines technical knowledge with a business degree and agency-level communication skills to keep clients, general contractors, vendors and crews on schedule.

EXPERIENCE

On-Site Supervisor / Administrator · *Arthur Mechanical LLC, NJ* 11/2025 – Present

- Serve as the main point of contact between Arthur Mechanical and general contractors on active commercial job sites; attend contractor meetings and keep timelines, updates and next steps aligned.
- Manage client and contractor communication and email correspondence, and prepare job proposals and bids.
- Build detailed material lists for each project and work directly with vendors to source materials, confirm pricing and secure on-time deliveries.
- Supervise field staff and support scheduling and job coordination across multiple sites.
- Respond to emergency service calls that need immediate troubleshooting and resolution.
- Integrated Housecall Pro to streamline internal workflow, improve job tracking and strengthen operational efficiency.

HVAC Service Technician · *Edison Heating & Cooling, Edison, NJ* 01/2021 – 03/2021

- Serviced, repaired and maintained residential and commercial HVAC systems, including boilers, furnaces and rooftop units.
- Explained repair recommendations clearly to homeowners and promoted maintenance plans and equipment upgrades.
- Kept a clean, organized work area and service vehicle for efficient, professional service.

Mechanical Apprentice, 2nd Year · *Johnson Controls, Charlotte, NC* 06/2019 – 11/2020

- Assisted with maintenance and service of commercial HVAC systems: filter replacement, coil and chiller tube cleaning, and cooling tower maintenance.
- Supported troubleshooting on mechanical systems and made sure all work met quality standards, with sites cleaned and secured before leaving.
- Completed pre-job safety checklists and inspected tools and equipment for proper operation and safety compliance.
